- Comfortable with stochastic calculus, Monte Carlo, and machine learning for signal research and modeling
- Skilled in relationship management across diverse industries, with proficiency in advanced Excel, VBA, Python for modeling, automation and analytics

EDUCATION

National University of Singapore (NUS)

Aug 22- Dec 24
Aug 14- Dec 17

- Master of Financial Engineering; Focused on option pricing, stochastic calculus, and applying machine learning techniques to model financial risks and optimize trading strategies
- Implemented Kirk's approximation and change-of-numeraire methods for spread option pricing in Final Year Project: Application of Spread Option in LNG Geographical Arbitrage
- Bachelor of Business Administration; Double Specialization in Finance and Supply Chain Management Cumulative Average Point 4.43/5.0 (Honors with Distinction), Dean's Lister (top 5%)

Jan 13- Dec 14

Victoria Junior College

- GCE 'A' Levels; Awarded distinctions in Chemistry, Mathematics, Chinese, Physics and Project Work

WORK EXPERIENCE

Jul 23 – Till Now

Centrica LNG, Singapore

LNG Trading Analyst

- Utilizing advanced option pricing models and stochastic calculus to evaluate LNG trading strategies
- Building and maintaining pricing / scenario tools in Python / Excel, streamlining decision-making processes
- Performing in-depth deal analysis across short / mid / long term opportunities, providing insights into term structure, market trends, price volatility, and contract optionality to support strategic decision-making
- Automating daily PnL and exposure analytics across portfolios; implementing reconciliation that reduce PnL breaks and accelerating end-of-day sign-off; reducing manual process by 30%

Jul 22 – Jul 23

Woodside Energy Trading Singapore Pte. Ltd., Singapore

LNG Trading Analyst

- Conducting market analysis and formulating timely & forward-looking views of gas market developments
- Delivering trading and optimization idea write-ups with scenario backtests and risk/return summaries
- Coordinating with Market Risk / Shipping / Ops to align pricing assumptions and delivery optionality; reducing pricing-to-booking discrepancies throughout trade lifecycle
- Performing post deal analysis and reconciliation on P&L against pre-deal shipping economics

Feb 17 – Apr22
(May19 – Apr22)

ENGIE Global Market, Singapore

Sales and Trading – Commodity Derivatives

- Quoting APAC clients on energy derivatives; developing valuation methods for common options / swaps and improved pricing consistency via standardized inputs and Greeks checks. (Oil, Gas, Power, and Coal)
- Working closely with research team and recommending strategies to clients based on physical needs
- Expanding business via actively searching new clients and generating more deals with existing clients

(Feb17 - May19)

Trade Support Analyst

- Managing trade lifecycle (booking, confirmations, settlements) for futures/options
- Leading automation projects by implementing new systems and proposing automation plans
- Enhancing workflow and contributing to projects such as migrating portfolios, managing exotic products

ENRICHMENT ACTIVITIES

Projects and Research

- Actively exploring trading ideas on stocks from both fundamentals and technical perspectives
- Closely monitoring global markets as well as macros for personal enrichment
- Implementing sensitivity analysis for correlation and vol; evaluating hedge ratios and stress tests
- Systematic Signals (personal research): Prototyping Python back tests on energy / equity ETFs using mean-reversion, carry/term-structure, and volatility; tracking Sharpe, turnover, drawdown.

Aug 16 – Dec 18

NUS Business Analytics Consulting Society (BACS)

President & Analytics Consultant Team Leader

- Conducting Excel workshops for beginners and students who are interested in Business Analytics
- Involving in real life projects provided by partner companies
- Collaborating with team on data mining, cleaning, as well as visualization

AWARDS

- NUS CFA Scholarship; MOE SM1 Program Scholarship
- Gold Award in Singapore Mathematics Competition
